Subject: DEP Order

Dave:

In accordance with paragraph 1.a. of the Department's March 6, 2025 Order, as you are aware, Sunoco Pipeline L.P. (SPLP) has been providing bottled water to residents in the Mt. Eyre neighborhood since February 3, 2025, at SPLP's sole cost and expense.

Beginning on February 3, 2025 SPLP delivered bottled water to residents in Mt. Eyre neighborhood upon requests made by residents through the company's dedicated incident response hotline. SPLP also directly delivered bottled water to each of the 6 impacted properties in the Mt. Eyre neighborhood. According to the landowners' preference, bottled water is either delivered directly to residences or it is available for pick up at the landowners' convenience at SPLP's Community Support Center located at the Bucks Pump Station at 1798 Dolington Road, Yardley, PA, which is staffed during normal business hours. SPLP has also reimbursed residents for bottled water that the residents have purchased themselves.

Please note that SPLP has not restricted bottled water pick-up, delivery, or reimbursement to only those residents in the Mt. Eyre neighborhood topographic watershed plus 500-foot buffer as referenced in the Order, but rather SPLP has made bottled water available to any resident in the Upper Makefield community upon request.

Beginning on February 15, 2025, after SPLP's Community Support Center was established, SPLP began to keep a log of all water deliveries and pickups that have occurred, a copy of which is attached. As reflected on the attached log, since SPLP began keeping a log on February 15, 2025, SPLP has provided bottled water to residents more than 129 separate times, which includes multiple deliveries or pickups by certain residents in the Mt. Eyre neighborhood. As noted above, bottled water deliveries or pickup also happened before 2/15/25 to many residents in the Mt. Eyre neighborhood and beyond, but was not logged during that early time frame.

In accordance with paragraph 1.a. of the Order, SPLP will continue to provide bottled water to residents in the Mt. Eyre neighborhood topographic watershed plus a minimum 500-foot buffer upon request until

SPLP obtains the Department's approval of the remedial action plan required by paragraph 2.b of the Order.

Thank you
